## DETAILED ACTION

### *Election/Restriction*

1. Restriction to one of the following inventions is required

under 35 U.S.C. 121:

I. Claims 10-13 are , drawn to apparatus, classified in class 604, subclass 30.

II. Claims 14-20 are, drawn to method of use, classified in class 424, subclass 449.

2. The inventions are distinct, each from the other because of the following reasons:the inventions of groups I and II are distinct as the methods do not require the apparatus of Group I. Furthermore, the inventions of Groups I and II are different materially from one another and thus distinct. Moreover, the method of Group II may utilize more than one apparatus indicating that the methods are not apparatus specific dependent. The apparatus as claimed can be used to make a different product such as shown in U.S.Patent no. 4,588,580.

Art Unit: 1626

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Steven B. Pokotilow on 8/27/01 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to E. Sackey whose telephone
